- Common **JS libraries**;
- **GitHub actions**, **Docker**.
- Understanding of good user experience (**UX**), consulting.

Me in one sentence:

Front-end Developer, previously CTO, PM, and team leader with several years of commercial experience in building web applications, e-commerce platforms and websites.

Work Experience

SIGMA IT POLAND

Front-end Developer • Dec. 2021 - Present

Responsibilities:

- Building apps that improve quality of social care and social services in Sweden.
- Building reliable unit and integration tests.
- Performing code review, pair programming, knowledge sharing and mentoring.
- Being proactive; improving internal processes, tools, and solutions.

BRAVE NEW

CTO • June 2020 - November 2021

Responsibilities:

- Building and designing (from the architecture perspective) web apps and e-commerce platforms.
- Building the bridge between developers and the rest of the team.
- Providing support for other developers (code review, pair programming, substantive assistance).
- Performing an employment assistance and building the process of developers' recruitment.
- Sharing knowledge in the team and to the public (by carrying out webinars and [courses](#)).
- Implementing processes and rules for using GIT; introducing code and quality standards; assisting in building the company's wiki; improving data security.

Full-Stack Developer • June 2019 - June 2020

Responsibilities:

- Building websites and e-commerce platforms based on the design and technical specifications. Deploying and supporting them too.
- Assisting in writing specifications, offers, and estimating projects. Teaching sales how to estimate projects, and talk with clients about technical nuances even better.
- Working on a daily basis with clients, PMs, graphic designers, and other developers.

FREELANCE

WordPress Developer • Oct. 2016 - June 2019

Responsibilities:

- Building websites based on web design - for agencies, my own clients, and startups. Teaching teammates and clients. Negotiating and building strong relations.

Soft skills gained from my previous experience:

- Extreme responsibility;
- Team and project management;
- Time (mine and others) management;
- Effective and win-win oriented negotiating with clients, teammates and the management;
- Knowledge sharing, with empathy and understanding;
- Effective problem solving (also under the pressure).

The rest of my technical competences (I prefer not to work with them currently):

- **MySQL**, **MongoDB**, and **Mongoose**;
- A little bit of **Express.js** and **Node.js**;
- **Vanilla PHP**;
- **WordPress** with a deep understanding of the information flow, hooks, filters;
WooCommerce, **Gutenberg**, **ACF**, **Sage**, and **Bedrock**.

Languages:

- **English** - C1/C2;
- **Polish** - native.

Volunteer Experience

GIRLS.JS

Mentor • November 2020 - Present

As part of the cyclical [Girls.js](#) events so far, I have taught the basics of JavaScript and web development four times - both online and offline.

Thanks to this, I developed the skills of transferring knowledge, communication, and other people's work organization, which is especially useful to me now when I manage other people's work (mostly developers) or take the PM responsibilities.

ANIMA INTERNATIONAL

Activist • June 2019 - March 2022

I supported the Open Cages (and Anima International which Open Cages are the part of) IT department in technologies such as Vue.js, Node.js, or WordPress as Headless CMS, working on [RoślinieJemy](#) website, for instance. I created blog articles and organized local events.

Currently, I operate as part of a nationwide media group, performing in public, contacting journalists, and creating press releases.

Thanks to my activity as an activist, I developed public speaking and extra IT skills. And additionally, team management, project management (during the organization of individual events), and relationship-building skills.

In the end, a testimonial from one of Brave New's board members

Andrzej Kozdęba • CEO, Growth Manager

Robert is a diligent, great programmer, and additionally a reliable project manager who builds a great relationship with the client.

Despite his young age, Robert has a professional approach to duties and great independence. By commissioning him the tasks, I was sure that they would be completed as planned. I never had to worry about anything.

Robert knows Front-End as a whole, Jamstack, and WordPress very well and learns quickly. He always finds answers to questions.

And with all that, which in my opinion is the most important, Robert is a trustworthy person who follows his principles and is faithful to his values
